# GREETING!

EVERY person interested in the lighting of Homes, Churches, Stores, Theatres and Public Buildings, from the architect to the ultimate tenant or visitor, should know that UN-SHADED electric lights are a menace to the Eyesight—therefore, to Health and Happiness.

GLOOM and GLARE can be banished by the use of proper glass shades, and these should be not only efficient, but cheerful and in harmony with the environment in which they are used.

This company carefully watched and checked the movement and final result of the nation-wide campaign for BETTER HOME LIGHTING. The vote for glass shaded light was overwhelming and an incentive for us to design and produce artistic illuminating glassware.

The result of these efforts you will find illustrated in this catalog —many pages in color—and we are confident you will be favorably interested.

Particular attention has been given to creating new lines of Commercial Units, also a new glass developed in our laboratories —wonderfully efficient and without glare. We call it NITROGLAS.

The shapes, too, are scientific—designed to give maximum results.

Except as indicated, all glass will be packed in cartons. We make no charge for packages.
